

Manage the Complete Bid-to-Bill Process
of Your Services Business

NetSuite SuiteProjects

SuiteProjects is a Professional Services Automation (PSA) solution natively built on NetSuite. SuiteProjects combined with Customer Relationship Management (CRM), and accounting/Enterprise Resource Planning (ERP), provides a comprehensive single platform to run a services business. SuiteProjects quickly generates tangible results while driving increased resource utilisation, elevating on-time project delivery, expediting billing cycles, improving invoicing accuracy, streamlining revenue recognition, reducing overhead, and increasing visibility into your services organisation.

Key Benefits

- Streamline operations and drive profitability by optimising the entire services business lifecycle.
- Faster project completion, better resource utilisation, and more accurate and efficient invoices.
- Increase visibility across your business, including forecasts, resources, projects, and KPIs.
- Anytime, anywhere web and mobile access.
- Real-time reporting on key metrics such as project profitability and resource utilisation.
- Gain real-time, global business management and financial consolidation.

Why SuiteProjects?

SuiteProjects helps services-based businesses complete projects more quickly, generate invoices accurately and efficiently, and speed accounts receivable cycles so you improve cash flow and eliminate revenue leakage. With SuiteProjects, you gain complete visibility into and control over your entire services business—in real time, from the moment a new opportunity is identified through to project delivery, invoicing, and revenue recognition, all while eliminating double entry, multiple systems, and costly integrations.

SuiteProjects Key Features

Project Management. Enable project managers and team members to collaborate on projects and maintain current and accurate project status at all times, allowing managers to proactively identify and resolve potential issues with each engagement.

Resource Management. Project managers can optimise staffing and utilisation by minimising bench time and ensuring that qualified resources are working on the right projects.

The screenshot displays the Oracle NetSuite SuiteProjects dashboard. At the top, there is a search bar and a navigation menu with options like Activities, Sales/Marketing, Expenses, HR, Financial, Reports, Documents, Setup, PSA, and Support. The user is identified as Marc Collins, Services - Project Manager. The dashboard is titled 'Home' and includes several portlets:

- Reminders:** 21 Time Records to Approve, 2 Expense Reports to Approve, 12 Open Purchase Orders, 2 Tasks that are overdue, 2 Tasks to complete.
- Services Alerts:** Charges On Hold, Hours: (21) To Approve, Milestones: (13) Due, Resources On Staff.
- Key Performance Indicators:** Open Projects (30), Billable Hours (+50.8%), Project Billing Forecast (+127.9%), Project Costs (-20.5%).
- Projects:** Abbott — Altima Technology : System Deployment, TOTAL:VIEW 63.
- KPI Meter:** Project Billing Forecast: \$274.2K.
- Shortcuts:** Project Manager, Projects & Resources, Time & Expenses, Procurement.

Configurable dashboards and reporting allow every manager real-time, personalised access to key metrics such as resource utilisation, profit margins, and project budget vs. actual.

Time and Expense Management. Intuitive timesheets and expense reports enable users to quickly and easily capture detailed time and expense costs, whether in the office or on the road.

Billing. Billing and invoice management automates simple services invoices as well as complex recurring, time and materials, and fixed fee contracts. NetSuite provides flexible billing options—such as completing project work, achieving project milestones, or according to a schedule of dates.

Project Revenue. Businesses with NetSuite Advanced Revenue Management can automate complex revenue calculations and allocations and support multiple revenue scenarios on a project-by-project basis.

Project Accounting. Connecting project activities with company financials helps ensure accurate accounting and billing throughout the project lifecycle and streamlines time and expense management while providing extensive project profitability reporting.

Analytics. Robust reporting and analytical tools, such as Project360, deliver on-demand, real-time data, enabling you to gain a 360-degree view of projects and portfolio health. Monitor, report, and analyse overall project performance in real time to quickly identify and take action on projects needing attention.

Anytime, Anywhere Access. SuiteProjects cloud-based system empowers the mobile services organisation supporting users where they work—on the go, at client sites, or remotely.

Increase resource productivity with interactive resource management including skill sets, availability, and robust resource searches.

Business Management for Global Services Organisations

Combine SuiteProjects with NetSuite OneWorld to manage multiple subsidiaries, business units, legal entities, global resource pools, billing rates in any currency, taxation rules, reporting requirements, and more, providing unprecedented real-time visibility, resource management, and operational control—all from a single system.

Single Solution

SuiteProjects unites professional services automation functionality with CRM and ERP to provide a complete solution for any business that provides services.

Customer Relationship Management

NetSuite delivers powerful customer relationship management (CRM) capabilities, including sales force automation (SFA), marketing automation, customer

support and service, and flexible customisation. NetSuite CRM is the only CRM solution that is completely integrated with the back-office and project delivery, reducing manual entry and risk of error, and accelerating processes. This seamless integration ensures your business is operating on the same customer and project data and gives you real-time visibility into your client lifecycle, from lead to close and fulfilment.

Financial Management and Forecasting

NetSuite Financials provides comprehensive financial/ERP capabilities that integrate with your back-office, sales, and project delivery processes. NetSuite Financials takes your business beyond traditional accounting software and equips you with the visibility you need to make better, faster, and accurate decisions.

Stay current anytime, anywhere with purpose-built mobile apps including easy time capture and expense receipts with picture attachments.
